

820 / 820.1 Transfer Table

The 820 is a transfer table from Herzog + Heymann. This unit is small but it can be attached to a large variety of machines in order to assist with transfers between units without taking up much space. The top and bottom belt transfer system on the 820 and 820.1 allows for a high level of control during the transfer process. With the 820.1 you gain the ability to perform spreading because it only uses round belts.

Features & Benefits

- Dual belt transfer system allows for maximum control of product via contact points along the top and bottom of the sheet
- Can be equipped with flat belts or round belts depending upon printers needs
- Compatible with a wide range of MBO and Herzog+Heymann finishing modules
- Independent self control allows operators to set speeds independent from other modules in a system
- Capable of product spreading when equipped with round belts
