

■ Digi-FW 780/6 Digital Buckle Folding Machine

The Digi-FW 780/6 is a modification of the 8-page folding unit used in the B 30S Perfection folding machine. This unit can communicate with other digital machines and can run high speed production. Its MBO engineering makes it one of the fastest and most durable folding machines available. Because the Digi-FW 780/6 can be controlled independently it can be used with a variety of older machines or machines from other suppliers.

■ Features & Benefits

- For use inline with presses or as part of an offline/near-line web finishing solution
- 6 fold plate configuration to meet a wider range of job application requirements
- High Speed Guide along the register table for non-marking product registration
- MBO spiral fold rollers provide grip and durability
- Slitter Shaft Cassette for quick adjustments to the slitter shaft without having to remove any fold plates.
- Fast make ready and high speed output make this folder ideal for high-speed letterfolding and signature folding

■ Options

- High Grip fold rollers for specialty applications
- Speed synchronization to automatically match the speed of additional modules
- Automated fold plates and fold rollers
- Noise Hoods
- Gatefold plate for specialty applications
