

## 381 Cutting Unit

The 381 cutting unit from Herzog+Heymann is a very adaptable cutting machine available in a wide range of working widths. This machine can do many cutting functions, all that is needed is the appropriate knife. Because of its versatility there are a number of options available to the 381 that allow one to make the 381 cutting unit even more useful. Thanks to MBO's modular approach to finishing, the 381 Cutting Unit is compatible with Herzog+Heymann and MBO finishing modules.

## Features & Benefits

- For use inline with presses or as part of an offline/near-line web finishing system
- Compatible with MBO and Herzog+Heymann finishing modules
- Independent self-control allows operators to set speeds separately from other units if desired
- High speed guides along the table maintain or register product during transport
- Robust components capable of withstanding a 24/7 commercial print environment
- Available in a wide range of working widths to best fit a variety of job applications
- Lightweight and mobile, this module can be used as a place holder in "mix-and-match" finishing environments
- OPTIONAL: Speed synchronization with a press or alternative finishing module
