

## 701 Shingled Stream Delivery

The 701 is designed to streamline product delivery. After the folding process, the 701 delivers the product in a uniform shingled order for easy handling. One of the unique features of this delivery is its batching process. This machine will speed up its belts in order to create a gap between batches, allowing for the rest of the production process to continue without inefficient stoppages. The adjustable catch wheels and adjustable height ensure a smooth and efficient sheet transfer for a variety of job formats. Additionally, the 701 is available in 6 different working width configurations.

## Features & Benefits

- For use inline with presses or as part of an offline/near-line web finishing solution
- Compatible with MBO and Herzog+Heymann finishing modules
- Independent self-control allows operators to set speeds separately from other units if desired
- Capable of multi-up production
- Robust components capable of withstanding a 24/7 commercial print environment
- Available in a wide range of working widths to best fit a variety of job applications
- OPTIONAL: Table extension to allow for more product along the delivery table
