

KAS 30ME Vertical Delivery

The KAS 30ME is a vertical delivery specifically designed for small format products. The infeed on this machine is a top and bottom spaghetti belt system which allows for greater control during spreading. Product remains under control because of a pair of stabilizing delivery guides on the tray. Additionally, the KAS 30ME is equipped with an independent self-control, meaning it can be used in a wider range of configurations including lines with older machines or machines from other suppliers.

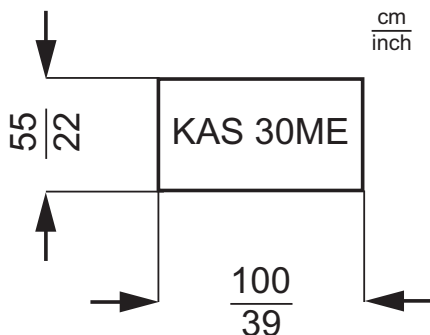

Standard Features

- Independent self-control
- Top and bottom belt infeed system
- Marking device
- Integrated light barrier and counter
- Stabilizing delivery guides
