

## 091.1 Mailing Table

The 091.1 mailing table is a very efficient way to fit multiple processes in a small amount of space. This machine can be mounted with a variety of components and each table can do one process every meter. Product is carried from one process to the next by the vacuum belt system. The vacuum system on this machine can detect the number of sheets on the belt and compensate by increasing or decreasing the suction strength.

## Features & Benefits

- Intuitive control panel for easy setup and operation
- Dual channel vacuum belt allows for greater product security along the mailing table
- Compatible with a wide range of MBO and Herzog+Heymann finishing modules
- Operator friendly electronic height adjustment
- Heat resistant belts allow operators to integrate hot-melt glue systems along the mailing table
- Workload awareness on the belt can increase or decrease suction strength depending upon how many products are along the mailing table

## Options

- Tipping, labeling, tape dispensing, plow folding, window patching, glue application systems, and print heads can all be mounted to the 091.1 Mailing Table
- Camera inspection and code verification systems for improved job integrity
- Speed synchronization to automatically match the speed of additional modules
- Additional vacuum channels for multi-up production
