

Mitra Automatic Sheet Stacker

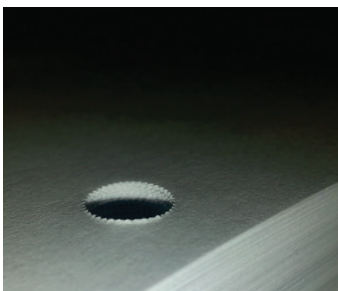

This picture shows the mitra700 Automatic Sheet Stacker.

The Mitra can be lined up with any production line for single sheets, dies, blanks etc. – even for multiple up production. After spreading the streams the mitra counts the sheets and stacks them to perfect blocks. By reaching the selected quantity, the stacks will be pressed to remove the air and delivered into running direction. With the mitra you have the perfect solution in automated handling for all kinds of productions like vertical cutters, die cutters, etc. even at high speed!

Features & Benefits

- Saves cost by automizing the delivery process.
- Perfect jogged stacks will be delivered onto a large buffer table.
- Inline production with digital printing machine possible (stacks can be delivered inline i.e. into a perfect binder)
- Infeed height adjustable
- Version or book block separation via barcode, printmark or counter.
- Automatic set up in running direction.
- Mobile - can be used with different machines.

Special devices to be able to stack difficult products like hole punched formulars

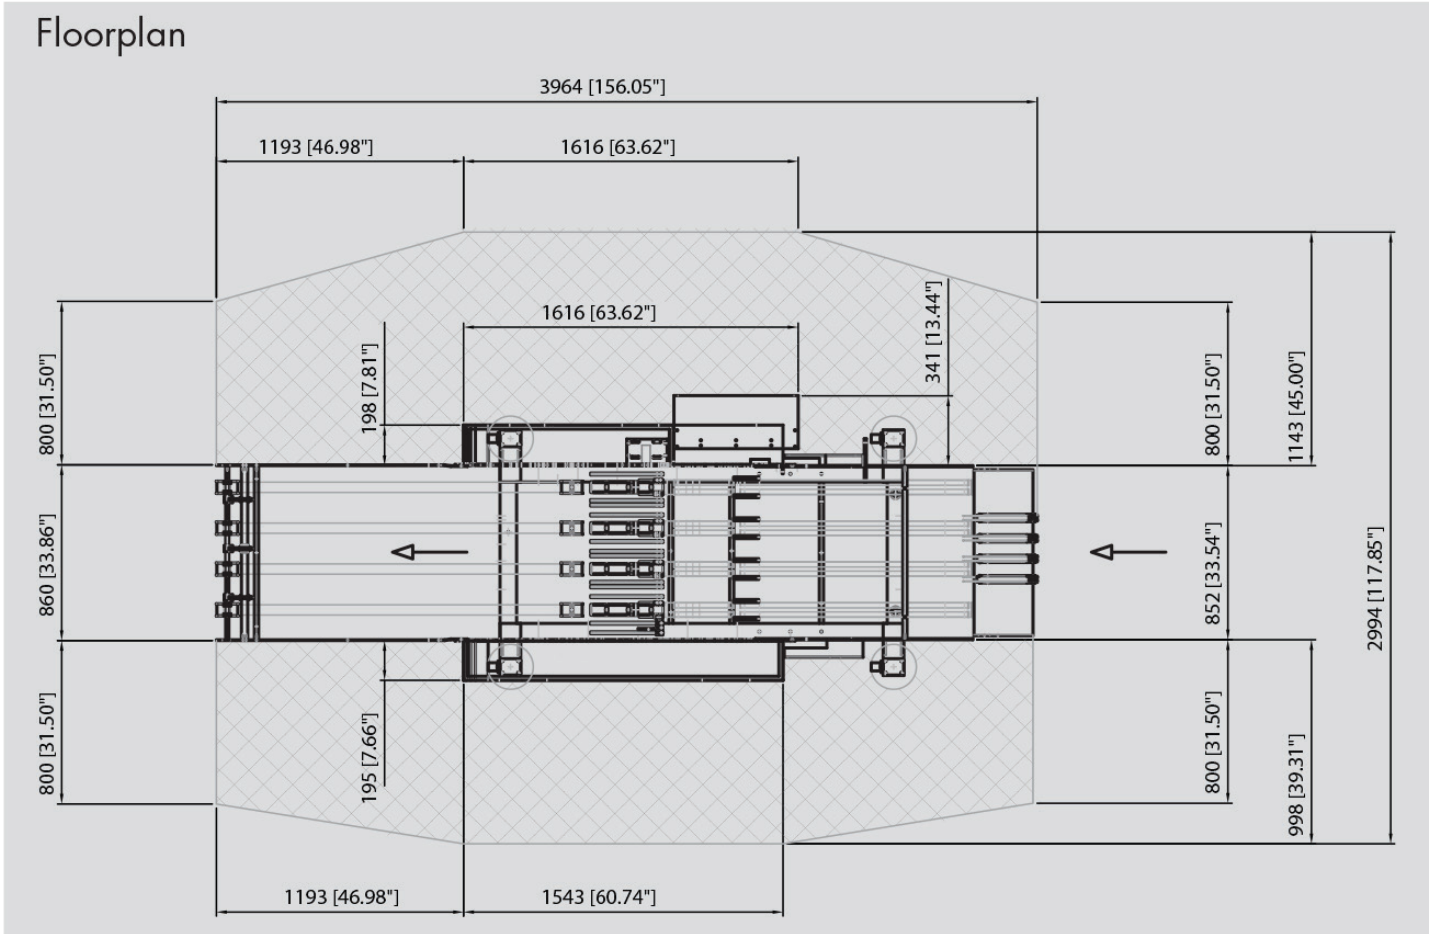

Precision shingle separation via barcode, counter or external signal

Big product buffer on ergonomic height for up to 6 product streams.

Multiple solutions to help you grow your bottom line.
