

SPM 520 Split and Merge Machine

The SPM 520 is a specialty machine designed to handle split and merge tasks quickly and efficiently. This machine is set up in-line and will split and then re-align sheets at high speeds prior to entering the next stage of production. The basic model comes with a longitudinal knife to trim away any unwanted edges and there is an upgrade available to incorporate a gutter cut blade for center cuts.

Standard Features

- Two webs
- Vertical and horizontal register
- Integrated blower to redirect the web
- STC static fixation technology for chip-out
- 3 LCUM for dividing web and side trim
- Pin feed and pin-less compatible
- LCS cutting system
