

# A56 Mobile Stream Delivery

The A 56 is a basic mobile stream delivery. Paper is fed onto this machine in a shingled stream and then stacked along the output table. Its space saving design makes it ideal for small print runs. Because of the non-marking conveyor system, this machine is great for newly printed products. With its independent self control, the A 56 can be used with a wide variety of old machines as well as machines from other suppliers.

## Features & Benefits

- For use inline with presses or as part of an offline/nearline finishing solution
- Product delivered via a shingled stream for easy handling along the delivery table
- Integrated marking device to stagger completed batch counts based on operator input
- Robust components capable of withstanding a 24/7 commercial print environment

## Specifications

- Maximum Working Width: 22 "
  - Minimum Infeed Height: 15 ¾ "
  - Maximum Infeed Height: 37 ¾ "
  - Minimum Loading Height: 19 ⅝ "
  - Maximum Loading Height: 35 ⅝ "
  - Maximum Speed: 396 inch/min
- \*Pending application and environmental factors
