

PFS Plowfold Station

The PFS Plow Folding Module from MBO America is a web based plow folding unit for 20 inch and 30 inch web finishing. This machine is designed to install prior to the sheeter to give an extra fold pattern, ie. gear side over op side, to web finishing lines. Used to make items such as newsletters and self mailers. The unit can accommodate a variety of paper types with high-speed capability.

Features & Benefits

- Adjustable plow lengths for different formats and paper types
- Movable fold head with 180° range to plow up or plow down
- Four adjustable folding assistance tools
- Integrated cutting/perfing prior to fold
- Driven roller front of plow for precise tension control
- Bypass rollers to skip the fold when not needed
- Integrated length cut device
- Maintains web tension via belt driven pull shaft
- Quick changeover unit to change from plow shoe to fold rollers
- Adjustable plow head
- Pull station

Specifications

- Rated Machine Speed: 820 fpm
*Pending application and environmental factors
- Minimum Web Width: 12 "
- Maximum Web Width: 30 "
- Paper quality dependent on the application

Caution:

If selected as an add on to an existing line, Master Frequency in the SVC Sheeter must be confirmed
