

702 Flat Track Delivery

The 702 is a variation of the 701 delivery system. This machine utilizes the same batching process as the 701, allowing for highly efficient batch deliveries. The 702 is different from the 701 in that it has a pivoting infeed where the 701 is stationary. This makes the 702 more adaptable to machine height variances and it is also more ergonomic for operators.

Features & Benefits

- For use inline with presses or as part of an offline/near-line web finishing solution
- Compatible with MBO and Herzog+Heymann finishing modules
- Independent self-control allows operators to set speeds separately from other units if desired
- Capable of multi-up production
- Robust components capable of withstanding a 24/7 commercial print environment
- Available in a wide range of working widths to best fit a variety of job applications
- OPTIONAL: Table extension to allow for more product along the delivery table

*All features are subject to change without notice.

Multiple solutions to help you grow your bottom line.
