

271 Vertical Stacking Delivery

The 271 Vertical Stacking Delivery was designed specifically with versatility in pharmaceutical applications in mind. With the number of options available, this delivery system is ideal for PI work, miniature folding, and insert or outsert production. Its pivoting height adjustment is easy to use and the infeed height can range from 50 cm to 90 cm - making it compatible with a wide range of knife folding machines and buckle folding machines as well as machines from other suppliers.

Features & Benefits

- For use inline with presses or as part of an offline/near-line web finishing solution
- Compatible with MBO and Herzog+Heymann finishing modules
- Independent self-control allows operators to set speeds separately from other units if desired
- Capable of multi-up production
- Robust components capable of withstanding a 24/7 commercial print environment
- OPTIONAL: Table extension to allow for more product along the delivery table

*All features are subject to change without notice.

Multiple solutions to help you grow your bottom line.
