

FRK Servo Friction Feeder

The FRK Servo Friction Feeder is the ideal machine for feeding flat product along a mailing table. Its quick loading magazine is easy for operators and provides precise alignment prior to feeder for a more accurate placement. The FRK Servo is also equipped with a sensor that can detect misfeeds and optional equipment such as suction infeed, wide track belts, or shingle stream feeding - giving printers the ability to use the FRK Servo with a variety of insert products. Thanks to MBO's modular approach to finishing, this unit can be mounted along mailing tables or used as a stand alone feeder.

Features & Benefits

- Touchscreen control panel for easy setup and operation
- High speed servo motor is powerful enough to feed thick or heavy insert products with precision
- Compatible with a wide range of MBO and Herzog+Heymann finishing modules
- OPTIONAL: Feeder belt extension, suction module, stand alone mount, wide track feeder belt, shingled stream feeding system, product leveling at the loading magazine,
