M80 System Sold In Estonia

As a result of discussions during China Print, MBO has sold an Automated M80 System to one of Estonia's largest printing and post-press finishing conglomerates, Tallinna Raamatutrükikoja OÜ. This company has been specializing in high-quality book production since 1985 and had previously equipped their facilities with MBO's competitor's machines, but the M80 Flexible Folding System provided a cutting-edge solution too good to overlook. In order to achieve faster turn-around times and to be more adaptable to the changes in the post-press industry, the Estonian company purchased the Automated M80 System with a pallet feeder, crossfold unit, threefold unit, and a vertical stacking delivery. The new system will be installed by year's end.
