

MBO – Pharmaceutical Finishing Systems

Available as an inline
or near-line solution

The requirements for pharmaceutical applications are constantly changing - which is why MBO's modular approach to finishing is perfect for this market. The specialty finishing equipment from Herzog+Heymann is 100% compatible with MBO web finishing modules and allows the processing of ultra-lightweight paper used in pharmaceutical inserts,

outserts, and PI work. With the vast array of modules available in its product portfolio, MBO America can offer pharmaceutical finishing solutions for both highly custom packaging applications and simple miniature folded insert pieces.

This solution generally consists of the following modules:

- Feeder System (Pile Fed or Web Fed)
- Sheeting Unit (For Web Fed)
- Herzog+Heymann Specialty Folding Unit
- Vertical Stacking Delivery System for Miniature Folded Products
- Additional Modules for Specialty Applications
 - Die Cutting
 - Water Scoring
 - Edge Trim, Gully Cut, 3-Knife Trim
 - Camera Inspection Systems
 - Labeling/Tabbing Devices
 - Affixing/Tipping Units
 - Knife Folding Units
 - Pick and Pack Delivery System
