

■ R 535 Continuous Feeder

The R Series continuous feeders were designed to increase the production efficiency of high volume jobs. Paper is loaded along the top conveyor and then looped around to the bottom conveyor, doubling your load capacity and creating a horizontal queue of paper which can be fed through at high speeds. Because of its innovative design an operator can continually load paper onto the top conveyor without ever stopping production.

■ Features & Benefits

- Top and bottom conveyor belt system
- Easy access to components
- Suction wheel at infeed
- Multi-roller-chain assist at top and bottom conveyor transfer
- Robust components capable of withstanding a 24/7 commercial print environment
